INNOVATIVE LIGHTING TECHNOLOGY, EXTRA-SLIM DESIGN

Modernste Edge-Lighting Technology durch speziell entwickelte Lichtleiterplatten vereint sich mit klarer Formsprache und schlankem Design zu einer funktionalen und variantenreichen Leuchtenfamilie. Die Produktfamilie ist als Baukastensystem konzipiert, sodass die Leuchten perfekt auf das Projekt abgestimmt werden können. Erhältlich sind Decken-, Einbau- und Pendelleuchten in unterschiedlichen Durchmessern von 400mm bis zu 1000mm sowie in direkt und direkt/indirekt strahlenden Versionen. Die perfekte Homogenität durch einen zurückversetzten, opalen oder mikroprismatischen Diffusor und ein schräg nach innen verlaufender Dekorring vervollständigen das ansprechende Design. Der Variantenreichtum schafft Abwechslung in der Raumgestaltung und ermöglicht ein spannendes Lichtkonzept innerhalb eines Raumes/Projektes.

Modern Edge-Lighting technology with specially developed light guide plates combines a clear design language with a slim style to create a functional and varied lighting family. The product family is designed as a modular system so that the luminaires can be perfectly matched to the project. The ceiling, recessed and pendant luminaires are available in different diameters from 400mm up to 1000mm as well as in direct or direct/indirect beam versions. The perfect homogeneity due to recessed opal or microprismatic diffusers in combination with the obliquely inward decorative ring complete the particularly appealing design. The wealth of variants creates variety in the interior design and enables an exciting lighting concept within a room or project.
